

National Center for Home Food Preservation Website

Elizabeth Andress (USDA funded National Center for Home Preservation) and Brian Nummer
University of Georgia

The National Center for Home Food Preservation, a CSREES-USDA funded project based at the University of Georgia, is pleased to announce the opening of our website. Please visit at <http://www.homefoodpreservation.com/> (.net, .org). The site is for science-based information on home food preservation for Extension educators, other educators and home food preservers. In addition, we want to represent the breadth of expertise within the entire Cooperative Extension System. The site is still a work in progress, but you will hopefully find something useful already. The links to other state Extension sites are far from finished, but there are some in place for you to see how we are listing other states' information and links. We are working especially hard to get some more releases of our Center's research projects up soon.

Please visit the site, look around at the types of information going into each link, and send us your feedback. There is a survey form online, at the following location: <http://www.arches.uga.edu/~bnummer/website-survey.htm> and we'd really like it if you could take the time to fill that out.

However, if you prefer to just submit general comments, there is also an "Info Request" form on the website that can be used for comments and questions at any time, or you can email bnummer@uga.edu

The site is just the beginning. We will add much more information as it is properly reviewed, updated, or researched. Your suggestions are welcome. Please forward this post to others in your organization who may have interest. Thank you very much and best wishes!

Brian A. Nummer, Ph.D., Project Coordinator
